## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, and 10, drawn to polypeptides, classified in class 530, subclass 350.
- II. Claims 4-8, drawn to polynucleotides and means of expression, classified in class 435, subclasses 69.1, 320.1, and 325, and class 536, subclass 23.5.
- III. Claims 9 and 10, drawn to antibodies, classified in class 530, subclasses 388.1 and 389.1.

Claims appear in more than one group because they encompass more than one invention.

The inventions are distinct, each from the other because of the following reasons:

The polypeptides of Group I are not related to the polynucleotides of Group II. They differ structurally and functionally, cannot be used interchangeably or together, and require non-coextensive searches and considerations.

The polypeptides of Groups I are not related to the antibodies of Group III. They differ structurally and functionally, cannot be used interchangeably or together, and require non-coextensive searches and considerations.

The polynucleotides of Group II are not related to the antibodies of Group III. They differ structurally and functionally, cannot be used interchangeably or together, and require non-coextensive searches and considerations.

Art Unit: 1646

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the different Groups are not co-extensive, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

SEQ ID No 1 or encoding polynucleotides SEQ ID Nos 2 and 3

SEQ ID No 4 or encoding polynucleotides SEQ ID Nos 5 and 6

SEQ ID No 7 or encoding polynucleotides SEQ ID Nos 8 and 9

SEQ ID No 10 or encoding polynucleotides SEQ ID Nos 11 and 12

SEQ ID No 13 or encoding polynucleotides SEQ ID Nos 14 and 15

These are different molecules with different structures; identification of one would not render the sequence of another obvious. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1646

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark Office on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
